AUTHOR INDEX TO VOLUME 12

Alexopoulos, N. G., 17

Capsalis, C. N., 171, 185
Carbonini, L., 273
Castaneda, J. A., 17
Chen, J., 57
Cwik, T., 343

Fikioris, J. G., 155

Herben, M. H. A., 57
Hill, D. A., 247
Hower, G. L., 1

Itoh, T., 285

Jakushkin, I. G., 93
Jin, J.-M., 105

Kaklamani, D. I., 185, 231
Kanellopoulos, J. D., 155
Ko, W. L., 403
Kochhar, R. P., 1
Krasnozhen, A. P., 121, 133
Krestjaninov, S. V., 93

Lakhtakia, A., 217
Lebedev, A. M., 93

Maagt, P. J. I., 57

Nevels, R. D., 147

Paleocrassas, S., 171
Permjakov, V. A., 93

Roetman, E. L., 1
Roumeliotis, J. A., 155

Schaubert, D. H., 381
Schutt-Aine, J. E., 359
Shanker, B., 217
Syed, H. H., 33

Ufimtsev, P. Y., 121, 133, 265
Uzunoglu, N. K., 171, 185, 231

Vesnik, M. V., 265
Volakis, J. L., 33, 105

Wandzura, S., 77
Wilton, D. R., 287
Wu, Z., 147

Yang, H.-Y., 17

SUBJECT INDEX TO VOLUME 12

Analysis and modeling of interconnects for high-speed digital applications, 359
Asymptotic feature of corner waves scattered by polygonal plates, 265
Approximate skew incidence diffraction coefficient for an impedance wedge, 33

Biconjugate gradient FFT solution for scattering by planar plates, 105

Current waves in a straight thin wire resonator with finite conductivity, 121

Electric current basis functions for curved surfaces, 77
Electromagnetic field and conduction current equivalence in the Lorentz and Coulomb gauges, 147
Electromagnetic scattering by a periodic surface with a wedge profile, 247

Integral representation for the fields in electromagnetic scattering problems, 1
Introduction to section dedicated to Professor Raj Mittra, 285

Microstrip antennas, 381
Modified geometrical optics and diffraction effects at the electromagnetic scattering by an inhomogeneous plasma, 93
Multifunctional and low RCS nonreciprocal microstrip antennas, 17

Natural current expansion approach to the numerical analysis of finite arrays, 272

Parallel decomposition methods for the solution of electromagnetic scattering problems, 343
Propagation characteristics of dielectric waveguides of double step permittivity with an arbitrary eccentricity, 171

Radiation of a dipole in an infinite triaxial anisotropic medium, 231
Radiation from a monopole antenna covered by a finite height dielectric cylinder, 185
Resonant frequencies in an electromagnetic spherical cavity with an eccentric inner electrically small sphere, 155
Review and comparison of some asymptotic techniques for calculating the wide-angle radiation pattern of paraboloid reflector antennas, 57
Review of current status and trends in the use of integral equations in computational electromagnetics, 287

Scattering from a straight thin wire resonator, 133
Scattering of Beltrami fields by anisotropic impedance spheres, 217

Time domain solution of electromagnetic problems, 403
